

Huawei energy storage photovoltaic panel customization

Overview

To use the configurator it is necessary to register, the advantage lies in the fact that in this way all the projects will remain online, so that they can be revised when needed. But not only that, it will be possible to customize both the place of installation but also the module, a very convenient. The basic function of the online configurator is to size the strings correctly with respect to the inverter and the photovoltaic modules. If the selected inverter is compatible with the optimizers, the system can also be dimensioned with these. It will therefore be possible to take. In presence of residential systems, there is also the possibility of having the automatic sizing of the battery pack. In addition to the usual data on the.
